AGREX LIQUID AND POWDER

SPECIFICATION SHEET

WHAT IT IS:

Agrex is a specially formulated, all natural for weaning pigs, gestating sows prior to farrowing, and for new feeders pigs under stress, as well as for poultry, as well as for poultry. Use Agrex Liquid in the drinking water.

WHAT IT DOES

Agrex is a scientifically balanced blend of all natural ingredients which when added to swine rations will lower the pH of the pigs digestive system helping reduce the pathogenic microorganisms (especially gram negative) and their harmful activity in the animal. At the same time helping activate the gastric enzymatic functions of the pig especially during period of stress. This process helps increase the absorption of protein and other nutrients.

APPLICATION:

The product is designed to be administered orally in the feed, and is presented either as a 20% powder for incorporation or as the liquid concentrate. The usage rates are 750ppm of the active product in the feed, and it should be administered for 10 days when there is infectious challenge present.
